

Tillgänglighetsrapport 2025-06-27

Genomfört av: Toby Morey, Webmaster (webmaster@opera.se)

Sidorna listade nedanför testades både av automatiserade verktyg samt med manuella tester – där tangentbord användes för navigering, talsyntes var aktiverad, och synskador simulerades.

Verktyg använt i testet

Automatiserade tester

- Lighthouse: <https://developers.google.com/web/tools/lighthouse>
- WAVE: <https://wave.webaim.org/>
- Axe Devtools: <https://www.deque.com/axe/>
- Silktide Accessibility Checker:
<https://chromewebstore.google.com/detail/silktide-accessibility-ch/mpobacholfblmnpnfbiomjkecoojakah>

Manuella tester

- WebAIMs färgkontrastanalysverktyg: <https://webaim.org/resources/contrastchecker/>
- Colour Contrast Analyser (CCA): <https://www.tpgi.com/color-contrast-checker/>
- NVDA, en talsyntes av NV Access: <https://www.nvaccess.org/>
- Web Developer: <https://chrispederick.com/work/web-developer/help/>
- Landmarks: <http://matatk.agrip.org.uk/landmarks/>
- HeadingsMap:
<https://chromewebstore.google.com/detail/headingsmap/flbjommegcjonpdmenkdiocclhjacmbi>
- A11y tools bookmarklets: <https://a11y-tools.com/bookmarklets/>
- Matomo, för analys av webbtrafik: <https://matomo.org/>

Sidor som testades

Listan över sidorna nedanför täcker samtliga sidmallar som finns på GöteborgsOperans publikwebbplats opera.se vid skrivande stund.

För att mäta eventuell påverkan på flest antal webbplatsbesökare, vi valde sidan per mall som har haft mest trafik under perioden sedan förra test, där det finns fler än en publicerade exempel av mallen på webbplatsen. Antaganden är att sidor som bygger på samma mall beter sig på ett väldigt liknande sätt till den valda exempelsidan.

1. **Startsidan** (Mall: *startsida*)
<https://www.opera.se/>
2. **Biljetter > Abonnemang** (Mall: *landningssida*)
<https://www.opera.se/biljetter/abonnemang/>
3. **Föreställningar** (Mall: *föreställningslistning*)
<https://www.opera.se/forestallningar/>

4. **Kalender** (Mall: informationssida med komplex kalenderlistning)
<https://www.opera.se/forestallningar/kalender/>
5. **12 songs & Sharon Eyal**, dans (Mall: föreställningssida som presenterar en evenemang med fler verk)
<https://www.opera.se/forestallningar/sasong-2024-2025/12-songs-sharon-eyal/>
6. **Charlie och chokladfabriken**, musikal (Mall: föreställningssida med mycket information)
<https://www.opera.se/forestallningar/sasong-2024-2025/charlie-och-chokladfabriken/>
7. **Mat och dryck > I pausen** (Mall: informationssida)
<https://www.opera.se/mat-och-dryck/i-pausen/>
8. **Ane Brun** (Mall: profilsida)
<https://www.opera.se/dans/gaster/ane-brun/>
9. **Sök** (Mall: Sökresultat som visar paginering)
<https://www.opera.se/sok/?q=charlie&page=1>

Fel som upptäcktes

1. Vissa moduler som består av grupperade länkar omslutade av en DIV-element borde skrivas om som UL- eller OL-listor för att underlätta assisterande teknologier.
2. Tabbar-placering flyttas inte vid klick på ankarelänk, utan fortsätter från samma position innan klick, dvs. markören kan kvarstå utanför visningsfönstret, och fönstret sedan hoppar tillbaka vid nästa tabbning.
3. Vissa länkar till externa webbplatser (t.ex. till sociala media-konton i sidfoten) har samma *title*-attribut men leder till olika adresser, som kan vara svårtolkade.
4. Vissa autogenererade, klickbara element (som biljettköpknappar) bode ha ARIA-attribut som tydligare särskiljer dem från andra liknande element på sidan.
5. Ett par angränsande ankarelänkar leder till samma ställe, och borde slås ihop till en länk.
6. Felstavning av ett formulärelement gör att ARIA-*describedby* attribut hänvisar till fel ID
7. Vissa rubriker har inkonsekvent ordning.
8. Elementet för att tömma sökfältet på sökresultatssidan har en touch-yta på 20x20px. Den ska vara 24x24px eller större enligt standarden.

Utskrifter från testerna genomfört med verktyget Lighthouse bifogas på följande sidor.

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

NAVIGATION

- ▲ Heading elements are not in a sequentially-descending order

These are opportunities to improve keyboard navigation in your application.
